How to Comply with Phase II

Dear Reader:

The following document was created from the CTAS electronic library known as e-Li. This online library is maintained daily by CTAS staff and seeks to represent the most current information regarding issues relative to Tennessee county government.

We hope this information will be useful to you; reference to it will assist you with many of the questions that will arise in your tenure with county government. However, the *Tennessee Code Annotated* and other relevant laws or regulations should always be consulted before any action is taken based upon the contents of this document.

Please feel free to contact us if you have questions or comments regarding this information or any other e-Li material.

Sincerely,

The University of Tennessee
County Technical Assistance Service

How to Comply with Phase II

Reference Number: CTAS-558

An operator of a small municipal separate storm sewer system has to apply to TDEC for a permit to discharge storm water and has to implement a series of storm water discharge "best management practices." These practices include the following:

1. An operator must develop, implement and enforce a storm water management program designed to reduce the discharge of pollutants from its MS4 to the "maximum extent practicable," to protect water quality and to satisfy the appropriate water quality requirements of the Clean Water Act.
 2. An operator's program must include six minimum control measures: (1) public education and outreach; (2) public participation/involvement; (3) illicit discharge detection and elimination; (4) construction site runoff control; (5) post-construction runoff control; and, (6) pollution prevention/good housekeeping.
 3. An operator must also identify its best management practices and measurable goals in its permit application. An evaluation and assessment of those goals and practices must be included in periodic reports to the NPDES permitting authority.
